

YAHIEL MALKA

Junior Product Manager | COMPUTER SCIENCE GRADUATE

Summary

Computer Science graduate with a strong technical and analytical background and hands-on experience developing end-to-end software projects. Experienced in translating requirements into functional solutions, working with APIs, databases, application flows, and user-facing interfaces. Strong problem-solving, communication, and organizational skills, with a keen interest in product development, user needs, and technology. Highly motivated to grow professionally as a Junior Product Manager.

Education

HIT | 2023-2026
B.Sc. COMPUTER SCIENCE

HIT course | 2025
AI BUSINESS ANALYTICS

Hands-on training in data analysis, Excel, Tableau, and data visualization.

TECHNICAL SKILLS

PRODUCT & ANALYTICAL

Requirements Analysis, User Flows, Data Analysis, Problem Solving, UX/UI Principles, Product Thinking

TECHNOLOGIES

REST APIs, MySQL, SQL, Node.js, Express.js

PROGRAMMING

Python, JavaScript, SQL, C

Development & Tools:

Git, React.js, Postman, HTML, CSS, Excel, Tableau

Experience

OPERATIONS COORDINATOR

CIVILIAN OPERATIONS CENTER

OCT-DEC 2023

- Coordinated operational requests and resources based on changing needs and priorities.
- Managed and prioritized multiple tasks in a fast-paced, time-sensitive environment.
- Collaborated with international stakeholders and internal teams to support operational requirements.
- Identified issues, adapted to changing requirements, and supported effective solutions.
- Maintained clear communication and follow-up across multiple ongoing activities.

TEAM COMMANDER

ISRAEL DEFENSE FORCES (IDF)

2021-2022

- Managed a team of 14 soldiers and coordinated daily operational activities.
- Planned, prioritized, and monitored multiple assignments simultaneously.
- Adapted quickly to changing requirements and resolved operational issues under pressure.
- Maintained clear communication, accountability, and timely execution across the team.

PROJECTS

FULL BIN DETECTION SYSTEM - FULL STACK

Developed an end-to-end waste management platform designed to support monitoring and management of smart bins.

- Translated functional requirements into application features and user flows.
- Developed and integrated frontend, backend, REST APIs, and MySQL database components.
- Designed user-facing functionality for managing bin data, locations, and fill levels.
- Tested end-to-end application flows and validated functionality using Postman.
- Identified and resolved issues across frontend, backend, APIs, and database components.

BLOCKCHAIN RENTAL SMART CONTRACT PLATFORM

- Developed a Web3 rental platform as part of a collaborative software project.
- Translated owner and tenant requirements into application workflows and smart contract functionality.
- Collaborated on the design and implementation of user-facing rental and payment flows.
- Integrated application components with Solidity smart contracts and blockchain interactions.
- Tested end-to-end workflows and resolved integration issues across system components.

Skills

- Analytical Thinking
- Requirements Analysis
- Problem Solving
- Attention to Detail
- Cross-Functional Collaboration
- Communication
- Prioritization
- Independent Learning
- Time Management
- English – Professional Working Proficiency
