

YAHIEL MALKA

Junior Project Manager | COMPUTER SCIENCE GRADUATE

Summary

Computer Science graduate with a strong technical background and hands-on experience developing end-to-end web applications. Experienced in translating requirements into functional solutions, working with APIs, databases, application flows, and user-facing interfaces. Strong organizational, communication, and problem-solving skills, with experience managing multiple tasks and coordinating between different stakeholders. Highly motivated to develop professionally as a Junior Project Manager in a technical environment.

Education

HIT | 2023-2026

B.Sc. COMPUTER SCIENCE

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming

HIT course | 2025

AI BUSINESS ANALYTICS

- Hands-on experience with data analysis, Excel, Tableau, and data visualization
- Analyzed user behavior and data to identify trends and generate business insights

TECHNICAL SKILLS

PROJECT & TECHNICAL

Requirements Analysis, User Stories, Definition of Done (DoD), Project Lifecycle, SDLC, Technical Documentation, User Flows

WEB DEVELOPMENT

HTML, CSS, JavaScript, React.js, Node.js, Express.js

SYSTEMS & TECHNOLOGIES

REST APIs, MySQL, SQL, Client-Server Architecture

DEVELOPMENT & TOOLS

Git, Postman, Excel, Tableau

Experience

OPERATIONS COORDINATOR

CIVILIAN OPERATIONS CENTER

OCT-DEC 2023

- Coordinated operational requests and resources based on changing needs and priorities.
- Managed and prioritized multiple tasks in a fast-paced, time-sensitive environment.
- Collaborated with international stakeholders and internal teams to support operational requirements.
- Identified issues, adapted to changing requirements, and supported effective solutions.
- Maintained clear communication and follow-up across multiple ongoing activities.

TEAM COMMANDER

ISRAEL DEFENSE FORCES (IDF)

2021-2022

- Managed a team of 14 soldiers and coordinated daily operational activities.
- Planned, prioritized, and monitored multiple assignments simultaneously.
- Adapted quickly to changing requirements and resolved operational issues under pressure.
- Maintained clear communication, accountability, and timely execution across the team.

PROJECTS

FULL BIN DETECTION SYSTEM - FULL STACK

Developed an end-to-end web application integrating frontend, backend, REST APIs, and MySQL database components.

- Translated functional requirements into application features and user flows.
- Designed and implemented frontend and backend functionality.
- Integrated system components through REST APIs.
- Managed and validated application data flows using MySQL.
- Tested end-to-end functionality and resolved issues across system components.

BLOCKCHAIN RENTAL SMART CONTRACT PLATFORM

Developed a Web3 rental platform as part of a collaborative software project.

- Translated owner and tenant requirements into application workflows.
- Collaborated on the design and implementation of rental and payment flows.
- Integrated frontend components with Solidity smart contracts.
- Tested end-to-end workflows and resolved integration issues.
