

YAHTEL MALKA

JUNIOR SOFTWARE DEVELOPER | COMPUTER SCIENCE GRADUATE

Summary

Computer Science graduate with hands-on experience developing full-stack applications and AI-powered systems using JavaScript, Python, React.js, Node.js, REST APIs, and LLM technologies. Experienced in multi-agent systems, OpenAI API integration, RAG, LangChain, Docker, and cloud deployment using Railway. Strong problem-solving and debugging skills with hands-on experience building, integrating, testing, and deploying end-to-end software solutions.

Holon, Israel

Education

HIT | 2023-2026

B.Sc. COMPUTER SCIENCE

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming

HIT course | 2025

AI BUSINESS ANALYTICS

- Hands-on experience with data analysis, Excel, Tableau, and data visualization
- Analyzed user behavior and data to identify trends and generate business insights

TECHNICAL SKILLS

Languages

JavaScript, Python, SQL, C, HTML, CSS

Frontend

React.js, Responsive Web Development

Backend & APIs

Node.js, Express.js, REST APIs, OpenAI API

AI & LLM

AI Agents, Multi-Agent Systems, LangChain, RAG

Databases

MySQL, SQL

Cloud & DevOps

Railway, Docker, Git

Testing & Tools

Postman, API Testing, Debugging

Experience

OPERATIONS COORDINATOR

CIVILIAN OPERATIONS CENTER

OCT-DEC 2023

- Coordinated operational requests and resources based on changing needs and priorities.
- Managed and prioritized multiple tasks in a fast-paced, time-sensitive environment.
- Collaborated with international stakeholders and internal teams to support operational requirements.
- Identified issues, adapted to changing requirements, and supported effective solutions.
- Maintained clear communication and follow-up across multiple ongoing activities.

TEAM COMMANDER

ISRAEL DEFENSE FORCES (IDF)

2021-2022

- Managed a team of 14 soldiers and coordinated daily operational activities.
- Planned, prioritized, and monitored multiple assignments simultaneously.
- Adapted quickly to changing requirements and resolved operational issues under pressure.
- Maintained clear communication, accountability, and timely execution across the team.

PROJECTS

AI MULTI-AGENT ORCHESTRATION SYSTEM

Developed and deployed an AI-powered multi-agent system accessible through Telegram and WhatsApp for managing and executing software development tasks.

- Designed specialized Architecture, Builder, and Debugging agents with intelligent task routing
- Integrated OpenAI API and LangChain with a RAG-based workflow for contextual retrieval and LLM interactions
- Integrated Telegram and WhatsApp bots for remote task submission and agent interaction
- Containerized external agent execution using Docker to provide an isolated environment
- Deployed the multi-agent system and messaging bots to the cloud using Railway

FULL BIN DETECTION SYSTEM - FULL STACK

Developed an end-to-end web application integrating frontend, backend, REST APIs, and MySQL database components.

- Translated functional requirements into application features and user flows.
- Designed and implemented frontend and backend functionality.
- Integrated system components through REST APIs.
- Managed and validated application data flows using MySQL.
- Tested end-to-end functionality and resolved issues across system components.

Skills

- Problem Solving & Debugging
- Software Development
- AI & Automation
- API Integration
- Team Collaboration
- Independent Learning
- Time Management
- Working Under Pressure
- English – Professional Working Proficiency
